

Photographs of recent Accident Investigation & Fraud Investigation claims Alpha Detective Agency have worked on:-

← LEFT | Broken gate at a local motor dealer forecourt after a VW Golf hit it at 15 MPH. The gate on both sides and the Concrete posts were destroyed.

→ RIGHT | Fire damage claim - a fire started in this vehicle via the wiring loom. The claim was declined after our investigation showed the Policy Holder had rewired his front headlights to flash like a Police Vehicle on a 999 call the day before the fire occurred!

← LEFT | This Freelander was hit in the Passengers side front by another vehicle exiting a Fast Food Drive-thru.

→ RIGHT | Attempted Theft of this vehicle was very unfortunate for the owner as our investigation found he had left his spare set of keys on the back seat. Unfortunately for the Thief the car had no Petrol in in at the time of the attempted Theft!
